

Webasto Live Charging Solution

Hardware | Installation | Service | Connectivity

Webasto Live offers the following benefits:

- Power Outpuut from 3.7 kW to 22 kW
- Optionally with 4.5m or 7m cable
- Type 1 (only up to 7.4 kW) and Type 2
- Cost-effective installation thanks to integrated DC-fault detection (≥ 6mA)
- Future-proof by supporting ISO standard 15118 ("Plug & Charge")
- Upgrade to OCPP 2.0 for advanced control commands and compatibility with all commercially available back-ends possible
- Maximum security for RFID with DESFire support
- Integrated 4G-modem for strong signal and high data transfer rates
- Local load management for up to 250 chargepoints, phase-accurate control
- Support of solar and tariff optimized charging through dynamic adjustment of charging power
- High quality "Made in Germany"

Technical specifications	
Electrical characteristics	
Nominal current (A) (configurable connected load values)	16 or 32
	3-phase or single phase
Line voltage (Europe)	230 V 1NAC
	230/400 V 3NAC
Grid frequency (Hz)	50/60
Overvoltage category	III in accordance with EN 60664
Protection class	<u> </u>
RCD	RCD I _N = 30 mA Typ A
Residual current protective device	6 mA RDC-MD
Integrated electricity meter	MID-compliant, accuracy class B according to EN50470-3 / class 1 according to IEC62053-21
Connections	
Cable feed	On-wall or in-wall mounted
Connection cross section (wire dimension)	The minimum cross section for a standard installation is – depending on the cable and the type of installation
	IEC 02 190-2
Power supply terminal	- rigid (min $-$ max): 2.5 $-$ 16 mm ²
	– flexible (min. – max): 2.5 – 16 mm²
	– AWG [American norm for cable gauge] (minmax): 13 – 6
	- flexible (min max) with wire end ferrule: 2.5 - 10/2.5 - 10 mm ²
Cable	Type 1 charging cable: up to 32 A / 250V AC according to EN 62196-1 and EN 62196-2
	Type 2 charging cable: up to 32 A / 400 VAC according to EN 62196-1 and EN 62196-2
	Length 4.5 m / 7 m - integrated cable holder
Output voltage (V)	230/400 VAC
Max. charging capacity (kW)	3,7 - 22 (adjustable)
Communiacation & Functions	
Locking mechanism	RFID-reader – supported chipsets for MIFARE DESFire EV1 and MIFARE Classic (ISO 14443 A / B) "Plug & Charge" (ISO 15118)
Display	8 RGB LEDs Buzzer
Network interfaces	LAN (RJ45) - 10/100 Base-TX WLAN 802.11b / g - 54 Mbps
Mobile	Slot for SIM-card (form factor 3FF / Micro-SIM) integrated 4G-modem (LTE)
Other interfaces	Modbus (RS485) - push-in USB 2.0 Type A USB 2.0 Type B
OCPP	Version 1.6 (upgrade to OCPP 2.0 in 2019)
Plug & Charge	ISO 15118-1 / ISO 15118-2
Local load management	Up to 250 chargepoints, dynamic, phase-accurate control
Solar / tariff optimized charging	Supports
Mechanical Data	
Dimensions (W x H x D) (mm) incl. Installation level	225 x 447 x 116
IP protection class	IP54
Protection against mechanical impact	IK08
Ambient Conditions	1
Operating temperature range (°C)	-25 to +55 (without direct solar radiation)
Temperature behavior	Within the operating temperature range, the charging current is permanently available posed. If the temperature is exceeded, the charge current specification will increase gradually 16 amps reduced, it can also come to shutdowns.
Storage temperature range (°C)	Arter a waiting periou, the charging process is automatically restarted
Jourage temperature range (C)	-25 to +/U
Absolute relative numbulty (%)	5 to 95 non-condensing
	Passive
Annuae (m)	IVIAX. 2,000 above sea level
Other standards and suidelines	
Other standards and guidelines	CE, IEC-EN 61851-1761851-22, KOHS, KEACH
אעמונפע טערץ ממנג-פחמג	Allego, nas.to.be, Fortum, Bouygyes, Virta, Charget-loud, Ladenetz, ChargelT, NTT, Driivz, new motion, Vattenfall, Char.gy
