

Impact screwdriver set

- 1- Bit holder for 5/16 bits. (I)
- 2- ½ square drive anvil. (II)
- 3- Chassis with built in impact drive mechanism. (III)

To adjust direction between clockwise or anticlockwise impact drive:

- Grip the chassis with one hand and the bit holder with the other.
- Twist the bit holder either clockwise or anticlockwise.
- The marking on the square drive anvil points on the marking on the chassis; R (right) or L (left).
